Note: Once you have the 2026.1.5us delta in place, please clear your **Browser Cache** before logging in.

This document lists the new inclusions, enhancements, fixes, and tax updates included in the 2026.1.5us release of Adapt.

2026.1.5us New Features

Paid Family and Medical Leave / 3rd Party Sick Pay	Issue ID
A new "Paid Family Leave Adjustments" option has been added to the Payroll Tax screen in Employee Payroll & Taxes. What This Means: • Clients can now enter an employee's PFML taxable wages and taxes — plus associated employer taxes — by Corporation, year, and quarter, including Federal, Social Security, Medicare, FUTA, and W-2 Box 12 Code J amounts.	AUS-20397
The payroll process has been updated to properly account for amounts entered for Social Security and Medicare wages and taxes for Paid Family and Medical Leave. What's Different:	AUS-20428

These changes ensure the applicable wage bases and limits are correctly maintained.	
The quarterly process has been enhanced to better support state Paid Family and Medical Leave programs. What Changed: The system now correctly tracks and reports PFML-related taxable wages and withholding amounts for Social Security and Medicare tax types, improving accuracy of quarterly regulatory reporting for clients in states with PFML requirements.	AUS-20430

2026.1.5us Resolved Issues

Compass	Issue ID
Previously, searching for an inactive client with the "Active Only" filter enabled returned a confusing error ("Unable to perform search (200)"). This has been corrected to display a clear message ("No companies found given the provided criteria.") when no matching results are found.	AUS-20380

Contacts	Issue ID
Resolved an issue where importing a batch containing both new and duplicate contacts could cause some new contacts to be skipped or overwritten. All valid contacts in an import batch will now be created correctly.	AUS-20420

Adapt US Tax Changes

Tax Updates [July/August/September 2026]
